

1012.

- | | | |
|-------|---|----------|
| 1009. | Air pump with manometer under bell and cock beneath plate, otherwise as before. | § 45,00 |
| 1012. | — with two glass cylinders and Babinet's cock. Plate provided with special tap, manometer cylinder ditto. Height of cylinders 230 mm, diameter of piston 55 mm, of plate 235 mm; screwed on polished walnut stand. On the pistons there should always be a layer of oil 5 mm thick, which when the pump is not in use remains in the cylinders. The necessary oil is provided. The pump is made with great care and is therefore perfectly reliable. [Fig. $\frac{1}{10}$ nat. size.] | » 100,00 |
| 1013. | — on mahogany base plate instead of stand. This pump can be fixed to bench by means of screw clamps (Nos. 1067—1070, p. 56) | » 90,00 |
| 1022. | Mercury air pump , Sprengel's type, with 3 fall tubes. On frame of oak. [Fig. $\frac{1}{10}$ nat. size, p. 55.] | » 18,75 |

The vessel to be evacuated is attached to the cone meant for this purpose after the latter has been properly greased and inserted. The mercury, previously dried as well
